My Message

La Bastilla, 25th of July 2013

Dear Sirs from Cupping for Education:

I have so many things to tell you as I am now fulfilling one of my greatest ambitions which is to be trained in making dairy products. It would be great if you could come and taste our mozzarella which is delicious. For your information, I have also used it to make a delicious pizza.

In Food Technology, I am also making cakes and I have learnt to make really tasty meringue. This year I have achieved a lot in the area of food production.

I am now hoping for an opportunity to specialise in coffee production, which is one of my other biggest dreams.

I have also learnt the importance of recording all of the information from the productive areas. In order to evaluate our work, we have to know precisely how much we are spending, so that we can work out the profitability from our businesses.

Everything is going well for me here in the Technical School, and I'm very happy to be learning so much.

I hope that you can come and visit us here soon.

Juana Rosa
